Python OOP – Object Oriented Programming for Beginners

Mini Project

Special Methods

Project Description:

- Explain the relationship between rich comparison methods and operator overloading.

- Provide an example of a class with all the rich comparison methods implemented and show how you can compare instances with them in the interactive shell (copy/paste the session).

Note: You will be able to check your solution with a sample answer as soon as you submit your mini project.

Tips: this article might be a good place to start researching about operator overloading.
